

**CONTAINER
CRANE
ELEVATOR**

- Low cost of ownership – Nonproprietary parts readily available on the open market
- Retrofit Ready for ease in installing new or replacing existing elevators
- ROI in less than 4 Years thanks to improved efficiency and reduced downtime
- Automatic rack lubricator is standard equipment
- Flat trailing cable which prevents inherent twisting found with round cables
- State of the art automatic lowering device to bring operators down in the event of a power failure
- Remote access and diagnostic system for improved customer support and troubleshooting
- Allows experienced operators to work longer, potentially reducing accidents due to fatigue from climbing

Changes/Errors excepted

**HIGH
QUALITY
MADE IN
GERMANY**

- A global leader in vertical access
- Over 90 years' experience producing quality products
- 80% of parts produced in-house in our ISO-9001 German factory
- One of the best after sales, service and technical support networks
- Dealer and service partner representatives available all around the world
- Engineering, Project Management, Service and Sales Department located in the HQ
